

PREFERRED ALTERNATIVE

SUMMARY

Construct a 15' wide multi-use path between Collins Avenue and Corbin Street on an alignment that runs primarily on or at the top of the bank of the Ohio River except in areas where physical constraints and/or right-of-way availability prohibit. Construction of retaining walls near the top of the river bank will be needed to accommodate grading and aid with slope stabilization.

The preliminary approximation of construction cost for this project is in the range of \$1.5 to \$2 million. The specific funding source for construction has not yet been identified.

ADVANTAGES

Separates Ohio River Trail facility from Riverside Drive.

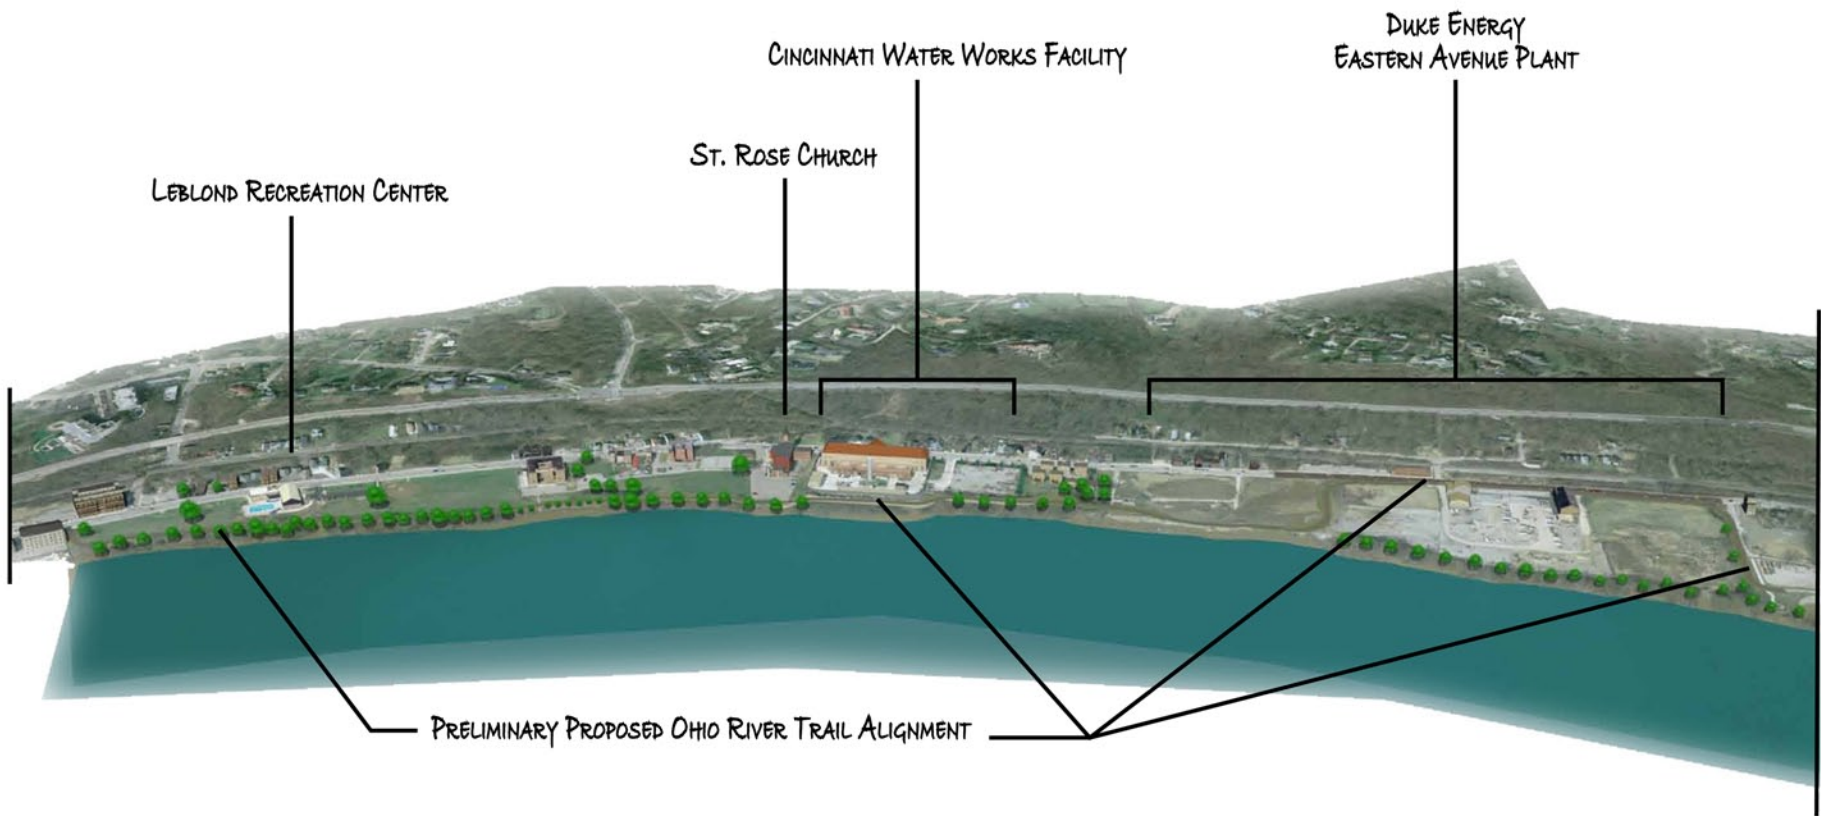

Better accommodates all classes of cyclists

Provides opportunity for scenic overlook areas

CHALLENGES

Constructability challenges related to Ohio River bank grades

Higher construction cost
